## EXPERIENCE

### SDE3

OpenGov 08/2025 Pune, India

Opengov is a cloud software company that provides AI-enabled ERP solutions and a public service platform to help U.S. local and state governments operate more effectively and accountably

- Working on the Reporting and Transparency team to enable all the product suites for proper insights. Technologies used are **NodeJS, ReactJS, Ruby, Postgres, Docker, Kubernetes, AWS**
- Driving product roadmap features and managing dev teams for delivering features and ensuring technical debt roadmap vision.

### SDE 2

Play Games 24x7 02/2023 - 08/2025 Bangalore/Mumbai

Games24x7 is a leading digital skill games company

- Handled critical systems related to user session management and backend web proxies used for our various products like **My11Circle, RummyCircle** which handle high scale upto 20 million active users. Extensive experience implementing new features and handling production issues, performance environments, observability, logging, alerting of services using **NodeJS, ReactJS, Python, MongoDB, Docker, Kubernetes, AWS (Elastic Cache, EKS, Load Balancing, Auto Scaling, CDN, Route53, Lambda, Cloudwatch etc)**
- Developed internal portals used by marketing/CS teams using **ReactJS, Redux, Typescript** etc along with the backend proxies in **NodeJS**.
- Worked extensively on system architecture and setups using different devops tools like **Jenkins, Terraform, and AWS**. Lead the migration of various high scale NodeJS systems from traditional **EC2 based AMD setups to K8 + ARM** based setups along with implementing canary deployment strategies and automation for better resiliency and fault tolerance.

### Full Stack Developer

Xooa Technologies 07/2022 - 02/2023 Pune

Xooa is a low-code platform for blockchain apps

- Developed new features in Xooa's low-code blockchain platform by working as a Full Stack Developer in technologies like **ReactJS and NodeJS, Serverless Framework, AWS and Blockchain (Ethereum and Hyperledger Fabric)**
- Handled entire software development lifecycle and coordination with various stakeholders for requirement gathering, **API designing, development, functional / performance / regression testing and production deployments**.

**Kubernetes . AWS . Blockchain . CI/CD .**

**Data Integration . Dynamodb . MongoDB . MySQL .**

**ExpressJS . Git . Golang . Google Analytics .**

**Advanced Google Sheets . Jenkins . Jest .**

**AWS Load Balancing . EKS . AWS Lambda .**

**AWS Cloudwatch . AWS Cloudfront . ElastiCache**

## EDUCATION

### BCS

#### MMCC

06/2012 - 06/2015 Pune, University of Pune

### MCA

#### MES's IMCC

06/2016 - 06/2019 Pune, University of Pune

### HSC

#### P Jog Junior College

06/2010 - 06/2012 Pune, HSC (Maharashtra)

### SSC

#### Abhinava Vidyalaya

06/2009 - 06/2010 Pune, SSC (Maharashtra)

## INTERESTS

### Learning New Technologies

Eager to learn new technologies and related concepts.

### Entrepreneurship

Aspiring to become a successful entrepreneur.

## SUMMARY

As a full-stack developer, I bring extensive experience developing and deploying software in JavaScript, ReactJS, Angular, and NodeJS, alongside Python and various other technologies. I have also worked on various Devops technologies like Jenkins, Terraform, Ansible, Docker, Kubernetes, AWS. With proficiency in deploying web apps and advanced web data integration and scraping, I have effectively enhanced team productivity through Agile methodologies. I seek to contribute my skills to a dynamic organization while continually advancing my technical expertise.

## STRENGTHS

### Communication and Learning New Technologies

Confident individual with great communication skills and a keen learner.

## EXPERIENCE

### Full Stack Developer

Excellerate (formerly known as Synerzip Softech)

11/2018 - 07/2022 Pune

Excellerate

- Developed project architecture, APIs, and database for the Timbukmove project in **NodeJS, ExpressJS and ReactJS**
- Implemented features for Email Verification and JWT Authentication.
- Played a key role in bug fixes and delegating tasks to solve technical problems of the team.
- Implemented various techniques for integrating data pipelines with web scraping platforms for Import.io in **NodeJS and Javascript**
- Developed key architecture for Envista OMS and worked developing backend as well as frontend in **NodeJS & Angular + ReactJS**
